Subject: Model Technical Specifications for States/UTs for ensuring seamless integration with NAFIS and FEDs
- reg.

Sir,

NCRB is in the process of procuring National Automated Fingerprint Identification System (NAFIS) and Fingerprint Enrolment Devices (FED). While NAFIS will be implemented at NCRB with connectivity to States/UTs for online verification of fingerprints, FEDs are being procured for implementation in each police station for enrolment of fingerprints. RFPs are in the advanced stage of approval with the ministry.

NAFIS needs to be connected with States/UTs to receive the fingerprint, photograph, demographic and conviction data. It is, therefore, desirable that model technical specifications (**enclosed for reference**) be made available to the States/UTs so that they can make use of these specifications for upgrading the existing AFIS or include the same in the RFP for procurement of AFIS or FED. This will ensure the faster search and seamless data migration from States/UTs.

It may kindly be noted that these model specifications provide complete and elaborate technical guidelines to incorporate technical compliance and technical specification for procuring AFIS solution. This would prevent non-standard technology being selected by States/UTs and ensure proper data integration with NAFIS.

Yours sincerely,

2/12/2013
(P R K Naidu)
Jt. Director (CCTNS)
